

You need to scrape all the products listed on a given URL of Faucets.com

e.g.

<https://www.faucet.com/kitchen-faucets/c80010?r=48&s=SCORE&p=1&categoryId=80010>

The script should be able to accept any category page URL of the faucets.com

and in return, it will give all the data of all the products listed on this url in an xls or csv format;

All the data on the page will be required i.e.

Product Name,

Image 1,2,3,4 etc.
